

DISCRETE MATHEMATICS
VOLUME 112, NUMBERS 1-3, 25 MARCH 1993

CONTENTS

<i>J.D. Berman, E.W. Kiss, P. Pröhle and Á. Szendrei</i> The set of types of a finitely generated variety	1
<i>C.-Y. Chao and Z. Chen</i> On uniquely 3-colorable graphs	21
<i>C. Chen and J. Wang</i> Factors in graphs with odd-cycle property	29
<i>M. Conder</i> Generating the Mathieu groups and associated Steiner systems	41
<i>P. Damaschke</i> Paths in interval graphs and circular arc graphs	49
<i>M.P. Delest and J.M. Fedou</i> Enumeration of skew Ferrers diagrams	65
<i>G. Ding</i> Disjoint circuits on a Klein bottle and a theorem on posets	81
<i>S. Gao and W. Wei</i> On non-Abelian group difference sets	93
<i>A. Knopfmacher and J. Knopfmacher</i> Counting irreducible factors of polynomials over a finite field	103
<i>L. Libkin</i> Direct product decompositions of lattices, closures and relation schemes	119
<i>D. Lou and D.A. Holton</i> Lower bound of cyclic edge connectivity for n -extendability of regular graphs	139
<i>T. Łuczak</i> The size of the largest hole in a random graph	151
<i>K.T. Phelps and C.A. Rodger</i> Nesting partial Steiner triple systems with 2-regular leave graphs	165
<i>A.G. Robinson and A.J. Goldman</i> The isolation game for regular graphs	173
<i>J. Rodriguez and A. Satyanarayana</i> A generalized chromatic polynomial, acyclic orientations with prescribed sources and sinks, and network reliability	185
<i>Z. Tuza</i> Multipartite Turán problem for connected graphs and hypergraphs	199
<i>M. Wild</i> Cover preserving embedding of modular lattices into partition lattices	207

Communication

H. Chabanne and N. Sendrier

- On the concatenated structures of a $[49, 18, 12]$ binary abelian code 245

Notes

B.W. Brock

- A new construction of circulant $GH(p^2; \mathbb{Z}_p)$ 249

G. Chen

- Hamiltonian graphs involving neighborhood intersections 253

P. Dolan and M. Halsey

- Random edge domination 259

G.-G. Gao

- On consecutive numbers of the same height in the Collatz problem 261

Z. Lengvárszky

- Distributive sublattices and weakly independent subsets in modular lattices 269

F. Maffray

- Antitwins in partitionable graphs 275

B. Mohar

- 7-critical graphs of bounded genus 279

R. Scapellato

- A characterization of bipartite graphs associated with BIB-designs with $\lambda = 1$ 283

S. Sridharan

- On the Berge's strong path partition conjecture 289

H. Zhou

- Inequalities with respect to graph homomorphism 295

- Author index to volume 112 299
